Career Objectives

- to utilize my proficiency in both front-end and back-end technologies to design and implement scalable, secure, and high-performing software solutions.
- My goal is to work in an environment that encourages collaboration, innovation, and professional growth, allowing me to continuously enhance my technical skills and stay updated with emerging technologies.

Skills

FrontEnd: ReactJS, Redux, React NativeNextJs,

BackEnd: NodeJS, ExpressJS, Django Rest Framework, FastAPI

Database Technologies: MySQL, PostgreSQL, MongoDB

Unit testing tools: Mocha, Chai, React Testing Library

Good Communication skills, people skills, aptitude, and problem-solving ability

Work Experience

Total Work Experience - March 2019 - Present [5 years]

Procedure Technologies Pvt Ltd, Pune — Principal Engineer, SDE3 [OCTOBER 2022 - PRESENT]

Project - Monaire [HVAC Management]

OCTOBER 2022 - PRESENT (~1yr 3m)

Role: Full-Stack Developer

Stack: React, FastApi, Postgres, Mongo, AWS

- Helped create an end-to-end HVAC and refrigeration management application for small businesses
- Developed new features and functionalities for Admin App [FE]
- Implemented REST APIs and introduced new features in the backend
- Successfully integrated multiple third-party libraries such as, Zoho, Things, Metabase, etc.
- Worked with Sensors and Sensors data [Resideo sensors]
- Managed and optimized database to align with project requirements
- Provided technical design and architecture reviews, contributing to problem-solving and solution development

- Worked on React Native app for a segment of users, Contractors, and created UI screens and flows for app released for both iOS and Android.
- Helped with a react native hosted on web app for a category of users
- Performed a significant overhaul of the front-end code, improving performance and maintainability
- Conducted prototyping of new features and revamped existing functionalities based on project needs
- Conducted code reviews and engaged in pair programming to assist fellow developers in resolving queries

Project - **Twarit** [Logistics Management]

APRIL 2022 - OCT 2022

Role: Full-Stack Developer

Stack: React, DRF, Postgres, AWS

- Worked from scratch to start and set up the project [FE and BE]
- Implemented JWT-based authentication and authorization on both frontend and backend, Permission management
- Implemented Frontend and backend CI/CD
- Implemented and handled database according to the requirement
- Involved in designing the system as per requirements
- Created APIs as per requirement, Unit Test cases for the same
- Created UIs and integrated APIs as per design and requirements
- Led a team of three developers, involved in task distribution,
- Code review and pair programming to solve doubts of fellow devs

Project - **HouseWorks** [Healthcare Domain]

October 2020 - APRIL 2022

Role: Frontend Developer with ReactJs

- Worked on new features in the website based on client interactions and design
- Enhanced existing features as per requirements
- Revamped existing forms, states, and flow
- Distributed code and converted into two separate platforms
- Created reusable components, API integrations

CypherTree Technologies Pvt Ltd, Pune — Software Developer October 2020 - APRIL 2022

Project - **HouseWorks** [Healthcare Domain]

October 2020 - APRIL 2022

Role: Frontend Developer with ReactJs

- Worked on new features in the website based on client interactions and design
- Enhanced existing features as per requirements
- Revamped existing forms, states, and flow
- Distributed code and converted into two separate platforms
- Created reusable components, API integrations

Project - **CT Forms** [SAAS] <https://app.forms.cyphertree.com/>

Role: Frontend Developer with ReactJs

- Started project from scratch, folder structure, bootstrap project, typescript, requirement gathering, designing mockups and wireframes
- Created a UI library for form-building in React with Antd.
- Worked on Higher-Order Components and Redux state management
- Event handlers inside the library and designed reusable components
- Designed and created a dashboard-styled website using Antd. Integration of **form builder** library in website
- Multiple user type authentication systems with JWT [login, register, forgot password, reset the password, change password, refresh token, etc features]
- Integrated REST APIs (CRUD), pagination, and lazy loading
- Worked to resolve cross-browser compatibility issues
- Additional features, events, handlers, form preview, component wrappers
- File Uploads, File Preview, **react-pdf** PDF viewer, etc third party integrations
- Reduced API calls wherever possible
- Used code versioning tool - Github, Merging PR, Domain and environment setup, Deployment of code, CD

Project - The Onboarders

- Started project from scratch, folder structure, bootstrap project
- Multiple user type authentication systems with JWT [login, register, forgot password, reset the password, change password, refresh token]
- Dashboard-styled website. Used Antd frontend. Responsive design.
- A multi-tenant website with subdomain implementation
- Consumed backend APIs (CRUD). Handled state management using Redux
- Multi-step form wizard implementation
- Came up with solutions, designs, and new features according to client requirements
- Building reusable components and front-end libraries for future use
- Toast notifications
- User authorization handling [menus different, 403]
- Invites to platform implementation
- Implemented plan-based features with trial functionality
- Consumed GST API
- Logo, Photo, and video upload functionality
- Implemented Kanban board functionality and drag-drop functionality

MARCH 2019 - OCTOBER 2020 (1 year 7 months)

ZCON Solutions, Pune — Software Developer

- Worked on NodeJs, and Express. Created RESTful APIs for CRUD operations.
- Integrated third-party APIs with App
- Worked on database structure and data handling of the projects. Used ORMs Sequelize, and Mongoose.
- Worked on DocuSign (An electronics Agreement management tool) integration
- Worked on Twilio SendGrid email API integration. EJS, NodeMailer.
- Worked on Stripe API integration (Online Payment Processing)

- Written **CronJobs** using **node-cron**
- Written **Unit Test** cases using **Mocha and Chai**
- Implemented data validations using **Express-validator, Joi Validator**
- Implemented authentication and security using **JWT**
- Implemented **Verified Registration** with **authenticated links to email**
- Implemented photo and file upload functionality using **Multer**
- Implemented logger using **Winston Logger**
- API documentation using **Swagger**
- Component modifications, **structuring, API consuming, Forms, and validations** In React

Education

August 2014 - June 2018

MIT Academy of Engineering, Pune — *B.E. Computer Engg.*
